Panel Title: “The Beyond 2020 Instrument Post ICCM5: An Ambitious Future for the Chemical Industry”

Background

Industry has supported the goals of SAICM since its inception and has worked tirelessly with all stakeholders and governments on finding a manageable and comprehensive path forward. ICCA and our member companies have been a strong supporter of SAICM’s voluntary, multi-stakeholder nature since its inception in 2006, and looks to reaffirm its continued support for the Beyond 2020 Framework.

As part of our support, ICCA and their members have worked to develop 3 high-level ambitions that show their support for the new framework. In Bonn, ICCA will bring CEOs and high level executives from chemical companies around the globe to Bonn to discuss the new ambitions, and how industry will continue to engage with the Beyond 2020 Framework.

This event will showcase how innovation enables industry to work towards the Objectives of the Beyond 2020 Framework, and provide an opportunity to have a continued discussion about how the work done under the new instrument will help us all reach the Sustainable Development Goals.

Logistics

The event is scheduled to take place from 17:00-18:30

Moderator: Chris Jahn, ICCA Executive Director
Confirmed Guests: Steffi Lemke, BMUV
Invited Guest: Inger Andersen, UNEP

Confirmed Panelists:
- Conrad Keizer, Clariant
- Harald Schwager, Evonik
- Karen McKee, ExxonMobil
- Thorsten Dreier, Covestro
- Nobuo Fukuda, Mitsubishi Chemical
- Walmir Soller Ferreira, Braskem
