25th September 2023, 14:15 – 15:00 h, German Pavilion

„Sustainable Management of fluorinated chemicals – best practices and success stories”

Fluorinated chemicals are applied in various products and processes in every day’s life such as cooling (Refrigeration and Air-Conditioning; RAC), foam production or solvents. The worldwide consumption of these synthetic, fluorinated gases, namely HFCs or F-gases, is still growing quickly. Many of these have an extremely high climate impact and other environmental impacts. This side event discusses how these chemicals are managed in a sustainable manner globally. Best practice cases and success stories for alternatives will be presented and discussed.

Moderation: Isabel Airas, GIZ Proklima

Agenda

1. Welcome Remarks Dr. Claudia Hiepe, Federal Ministry for Economic Cooperation and Development (BMZ) 5min

2. Application of fluorinated chemicals and its climate impact Bernhard Siegele, GIZ Proklima 15min

4. Q&A – Discussion All participants 5min

5. Closing Remarks Bernhard Siegele, GIZ Proklima 5min
